

Amplify HC

RETINOL SERUM

**INDICATIONS:**

- For all skin types.
- For mature skin with visible signs of aging.

FUNCTIONS:

- Increases the biosynthesis of collagen, elastin and GAGs.
- Rebuilds the entire architecture of the dermis.
- Plumping and densifying effect.
- Boost cell renewal.
- Smooths out skin irregularities.

VISIBLE RESULTS:

- Fine lines and wrinkles are filled and plumped.
- The skin becomes smoother, softer and suppler.
- The skin's texture is refined.
- The complexion radiates youthfulness.

DIRECTIONS: Apply evenly to the face and neck morning and night after cleansing the skin. Massage until completely absorbed. Finish by applying the appropriate cream.

MAIN INGREDIENTS: Retinoate, Tripeptide, Liposome of Phospholipids and Sphingolipids, Honey, Hyaluronic Acid, Hydrolyzed Collagen, Soy Protein, Acmeella Oleracea Extract, Citric Acid, Vitamin C, Vitamin E, Omega 3, Omega 6, Brassica Napus Seed Oil, Sweet Almond Oil.

ADDITIONAL INGREDIENT INFORMATION:

Retinoate	<p>Promotes new retinoid generation. Action similar to tretinoin without the side effects. Non-irritating. Reduces the appearance of fine lines and wrinkles. Increases the biosynthesis of collagen, elastin and GAGs. Stimulates cell renewal. Smoothing: improves skin texture.</p>
Tripeptides	<p>Innovative lipopeptide Stimulates the 6 components of the dermis +111% of collagen I production. +104% of collagen III production. +42% of collagen IV production. +75% of laminin V production. +174% of hyaluronic acid production. Rebuilds the architecture of the dermis. Strengthens the adhesion of the dermal-epidermal junction. Encourages cellular exchanges. Increases skin hydration.</p>

RETINOL SERUM

<p>Liposome Phospholipids and Sphingolipids encapsulating honey from flowers</p>	<p>Byphasic Spherules. Molecular structure identical to cell membranes. Transports the active ingredients within the cell. Restores the fat from the stratum corneum. Restructures the intercorneocyte cement of the epidermis. Improves the cohesion of epidermal cells. Improves skin hydration.</p>
<p>Hyaluronic Acid</p>	<p>Ultra hydrating: it holds up to 1000 times its weight in water. Fills up surface micro-wrinkles and plumps deep wrinkles. Small molecular weight: promotes the natural production of hyaluronic acid. Large molecular weight: protects and moisturizes the skin surface. Instantly smoothes the skin. Soft to the touch without a greasy finish.</p>
<p>Hydrolyzed collagen</p>	<p>Powerful moisturizer for the upper layers of the epidermis. Improves skin suppleness. Reduces the appearance of surface wrinkles. Smoothes the skin relief. Soothing.</p>
<p>Soy Protein</p>	<p>Revitalizes skin metabolism. Stimulates fibroblast activity. Promotes the synthesis of collagen, elastin and GAGs. Replumps and densifies the dermis. Improves flexibility and elasticity of the skin.</p>
<p>Acmella Oleracea Extract</p>	<p>Reshapes and replenishes the skin: immediate and instantaneous effect. Stimulates the production of fibroblasts. Contraction of the dermis. Increased interaction between the fibers and cells.</p>
<p>Citric Acid</p>	<p>Lemon Extract. Helps reduce the appearance of enlarged pores. Keratolytic: helps eliminate dead cells. Stimulates cell renewal. Astringent: reduces the size of pores. Refines skin texture. Hygroscopic: regulates skin hydration. Brightens dull complexions.</p>

RETINOL SERUM

Vitamin C	<p>Antioxidant: neutralizes free radicals. Encourages the elimination of hyper-pigmented cells. Improves' skin suppleness. Smooths out surface irregularities.</p>
Vitamin E	<p>Antioxidant: neutralizes free radicals. Reduces the risk of lipid per-oxidation of membranes. Protects cell membranes. Slows down premature aging of these cells. Strengthens the skin's immune system.</p>
Omega 3	<p>Essential fatty acid in the composition of the hydrolipidic film and cell membranes. Maintains the elasticity and suppleness of the skin. Precursor of many components required to maintain the biochemical and cellular functions. Anti-inflammatory: reduces redness and soothes irritation.</p>
Omega 6	<p>Essential fatty acid in the composition ceramides. Participates in the reconstitution of the epidermal lipids. Contributes to membrane fluidity. Limits water loss to maintain skin hydration. Soothing and nourishing.</p>
Brassica Napus Seed Oil	<p>Rich in essential fatty acids. Nourishing, moisturizing and restorative. Regenerates cell membranes. Softens and Provides suppleness to the skin.</p>
Sweet Almond Oil	<p>Restores the hydrolipidic film. Maintains lasting hydration. Softens and Provides suppleness to the skin. Excellent emollient. Soothes irritation, itching, and discomfort. Anti- inflammatory.</p>
