

HealPro  
EYE CONTOUR CREAM

**INDICATIONS:**

- For eye contour area.
- For dehydration, wrinkles, expression lines. (crow’s feet)

**FUNCTIONS:**

- Stimulates the production of collagen, elastin and hyaluronic acid.
- Promotes cell renewal.
- Has a densifying and plumping effect.
- Protects the delicate skin around the eye.
- Rebalances skin microcirculation.

**VISIBLE RESULTS:**

- Expression and dehydration wrinkles are filled.
- The skin appears smoother and softer.
- The area around the eyes is moisturized and protected.
- Dark circles and circulatory bags fade.

**DIRECTIONS:** Use morning and evening after cleansing, apply the treatment to the eye area. Carefully massage until absorbed.

**MAIN INGREDIENTS:** Liposome of Sphingolipids and Phospholipids, Honey, Hyaluronic Acid, Tripeptide, Retinol, Marine Collagen, Soy Protein, Acmeilla Oleracea Extract, Vitamin C, Vitamin E, Omega 3, Omega 6, Brassica Napus Seed Oil, Sweet Almond Oil, Citric Acid.

**ADDITIONAL INGREDIENT INFORMATION:**

<p><b>Liposome Phospholipids and Sphingolipids encapsulating honey from flowers</b></p>	<p>Biphasic Spherules. Molecular structure identical to cell membranes. Transports the main ingredients within the cell. Restores the fat from the stratum corneum. Restructures the intercorneocyte cement of the epidermis. Improves the cohesion of epidermal cells. Improves skin hydration.</p>
<p><b>Hyaluronic Acid</b></p>	<p>Ultra hydrating: it holds up to 1000 times its weight in water. Fills up surface micro-wrinkles and plumps deep wrinkles. Small molecular weight: promotes the natural production of hyaluronic acid. Large molecular weight: protects and moisturizes the skin surface. Instantly smoothes the skin. Soft to the touch without a greasy finish.</p>

## EYE CONTOUR CREAM

<b>Tripeptides</b>	<p>Innovative lipopeptide.          Stimulates the 6 components of the dermis.              + 111% of collagen I production.              + 104% of collagen III production.              + 42% of collagen IV production.              + 75 % of laminin V production.              + 174 % of hyaluronic acid production.          Rebuilds the architecture of the dermis.          Strengthens the adhesion of the dermal-epidermal junction.          Facilitates cellular exchanges.          Increases skin hydration.</p>
<b>Retinol (vitamin A)</b>	<p>Promotes new generation of retinoids.          Action similar to tretinoin without the side effects.          Non-irritating.          Reduces wrinkles and fine lines.          Increases the biosynthesis of collagen, elastin and GAGs.          Stimulates cell renewal.          Smoothing: it improves skin texture.</p>
<b>Soy Protein</b>	<p>Revitalizes skin metabolism.          Stimulates fibroblasts.          Promotes the synthesis of collagen, elastin and GAGs.          Replumps and densifies the dermis.          Improves flexibility and elasticity of the skin.</p>
<b>Marine Collagen</b>	<p>Powerful moisturizer of the upper layers of the epidermis.          Improves skin suppleness.          Reduces the appearance of surface wrinkles.          Smooths the skin surface.          Soothing.</p>
<b>Acmella Oleracea Extract</b>	<p>Remodels and replenishes the skin: immediate and instantaneous effect.          Stimulates fibroblast activity.          Contraction of the dermis.          Increased interaction between the fibers and cells.</p>
<b>Vitamin C</b>	<p>Antioxidant: neutralizes free radicals.          Encourages the elimination of hyper-pigmented cells.          Improves skin suppleness.          Smooths out surface irregularities.</p>

## EYE CONTOUR CREAM

<b>Vitamin E</b>	<p>Antioxidant: neutralizes free radicals.          Reduces the risk of lipid peroxidation of membranes.          Protects cell membranes.          Slows down cellular premature aging.          Strengthens the skin's immune system.</p>
<b>Omega 3</b>	<p>Essential fatty acid in the composition of the hydrolipidic film and cell membranes.          Maintains the elasticity and suppleness of the skin.          Precursor of many components required to maintain the biochemical and cellular functions.          Anti-inflammatory: reduces redness and soothes irritation.</p>
<b>Omega 6</b>	<p>Essential fatty acid in the composition ceramides.          Involved in rebuilding the epidermal lipids.          Contributes to membrane fluidity.          Limits water loss to maintain skin hydration.          Soothing and nourishing.</p>
<b>Brassica campestris Seed Oil</b>	<p>Rich in essential fatty acids.          Nourishing, moisturizing and restorative.          Regenerates cell membranes.          Softens and provides suppleness to the skin.</p>
<b>Sweet Almond Oil</b>	<p>Restores the hydrolipidic film.          Maintains lasting hydration.          Softens and Provides suppleness to the skin.          Excellent emollient.          Soothes irritation, itching, and discomfort.          Anti- inflammatory.</p>
<b>Citric Acid</b>	<p>Lemon Extract.          Helps reduce the appearance of enlarged pores.          Keratolytic: helps eliminate dead cells.          Stimulates cell renewal.          Astringent: reduces the size of pores.          Refines skin texture.          Hygroscopic: regulates skin hydration.          Brightens dull complexions.</p>
