

Hyaluronic PH

MOISTURIZING CREAM

INDICATIONS:

- For all skin types with dehydration.

FUNCTIONS:

- Rebuilds and preserves the quality of the hydrolipidic film due to its richness in fatty acids.
- Restores and maintains full hydration of the dermis and epidermis.
- Helps maintain a healthy cell renewal activity.
- Antioxidant, it neutralizes reactive oxygen species.
- Excellent anti-aging preventive care.

VISIBLE RESULTS:

- The skin is hydrated on the surface as in depth
- Oil-free finish
- Wrinkles and fine dehydration lines are visibly reduced
- The skin is soft and supple
- The complexion radiates health

DIRECTIONS: Apply to face and neck morning and night after cleansing the skin. Massage until completely absorbed.

MAIN INGREDIENTS: Brassica Campestris Seed Oil, Sweet Almond Oil, Liposome of Sphingolipids and Phospholipids, Honey, Hyaluronic Acid, Hydrolyzed Collagen, Bisabolol, Vitamin C, Vitamin E, Omega 3, Omega 6, Complex of Lime Peel, Pelargonium Graveolens Flower Oil, Camphor.

ADDITIONAL INGREDIENT INFORMATION:

<p>Brassica campestris Seed Oil</p>	<p>Rich in essential fatty acids. Nourishing, moisturizing and restorative. Regenerates cell membranes. Softens and provides suppleness to the skin.</p>
<p>Sweet Almond Oil</p>	<p>Restores the hydrolipidic film. Maintains lasting hydration. Softens and provides suppleness to the skin. Excellent emollient. Soothes irritation, itching, and discomfort. Anti- inflammatory.</p>

Hyaluronic PH

MOISTURIZING CREAM

<p>Liposome Phospholipids and Sphingolipids encapsulating honey from flowers</p>	<p>Biphasic Spherules. Molecular structure identical to cell membranes. Transports the main ingredients within the cells. Restores the fat from the stratum corneum. Restructures the intercorneocyte cement of the epidermis. Improves the epidermal cellular cohesion. Improves skin hydration.</p>
<p>Hyaluronic Acid</p>	<p>Ultra hydrating: it holds up to 1000 times its weight in water. Fills up surface micro-wrinkles and plumps deep wrinkles. Small molecular weight: promotes the natural production of hyaluronic acid. Large molecular weight: protects and moisturizes the skin surface. Instantly smoothes the skin. Soft to the touch without a greasy finish.</p>
<p>Pelargonium Graveolens Flower Oil</p>	<p>Anti Oxidant and antiseptic Balance hydrolipidic film Eliminate acne Heal burns, cuts, and eczema Anti-inflammatory Therapeutic Astringent properties</p>
<p>Camphor</p>	<p>Can increase collagen and elastin production in dermal fibroblasts to aid wound healing Reduce inflammation caused by acne Anti-fungal, anti-bacterial, and anti-microbial Sooth irritation Relieves itchiness May help provide relief from rashes</p>
<p>Lime Peel Oil</p>	<p>Antiseptic effects on fresh minor infections of the skin, including acne. Increases the skins immunity Keratolytic: helps eliminate dead cells. Stimulates cell renewal. Astringent: reduces pore size. Lightens hyperpigmentation Rich in powerful antioxidants like Vitamin C</p>

Hyaluronic PH

MOISTURIZING CREAM

Vitamin C	<p>Antioxidant: neutralizes free radicals. Encourages the elimination of hyper-pigmented cells. Improves skin suppleness. Smooths out surface irregularities.</p>
Vitamin E	<p>Antioxidant: neutralizes free radicals. Reduces the risk of lipid peroxidation of the membranes. Protects cell membranes. Slows down premature aging of these cells. Strengthens the skin's immune system.</p>
Omega 3	<p>Essential fatty acid in the composition of the hydrolipidic film and cell membranes. Maintains the elasticity and suppleness of the skin. Precursor of many components required to maintain the biochemical and cellular functions. Anti-inflammatory: reduces redness and soothes irritation.</p>
Omega 6	<p>Essential fatty acid in the composition ceramides. Participates in rebuilding the epidermal lipids. Contributes to membrane fluidity. Limits water loss to maintain skin hydration. Soothing and nourishing.</p>
